

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

Catalogue of Fruits for Cultivation in the
U.S. and Canadas · 1889

A
CATALOGUE OF FRUITS
FOR
CULTIVATION IN THE UNITED STATES AND CANADAS;
IN TWO DIVISIONS.

DIVISION FIRST—EMBRACING THOSE STATES LYING NORTH OF THE
SOUTHERN LINE OF VIRGINIA, TENNESSEE, MISSOURI, ETC., AND EAST
OF THE ROCKY MOUNTAINS, INCLUDING THE CANADAS.

DIVISION SECOND—THE STATES SOUTH OF THE LINE ABOVE NAMED,
AND WEST OF THE ROCKY MOUNTAINS.

COMPILED UNDER THE DIRECTION OF THE
AMERICAN POMOLOGICAL SOCIETY,
FROM THE
Reports of State and District Committees.

INTENDED TO EXHIBIT, IN A FORM CONVENIENT FOR REFERENCE, THE VARIETIES
OF FRUITS BEST ADAPTED TO THE DIFFERENT STATES AND LOCALITIES:
SUBJECT TO FUTURE REVISION AND CORRECTION, AS EXPE-
RIENCE MAY RENDER NECESSARY AND PROPER.

◆◆◆
REVISED EDITION.

Wm. Richard W. W.

PLAN OF THE CATALOGUE.

THE arrangement of the varieties is alphabetical, according to the nomenclature adopted by the Society. Synonyms are given in a few instances only, where it seemed necessary; and these are placed under the adopted name, in italics. The tabular arrangement has been adopted to obviate the necessity of repeating the names of varieties several times, as would be required if a separate Catalogue were made for several sections.

It has been decided by the Committee not to attempt, at this time, to give descriptions of the fruits recommended, but simply to indicate the season of maturity, use, and a few other particulars of importance, which require but little space. In regard to the season, it will be observed that, instead of naming the month or months in which fruits mature, the general terms "Summer," "Autumn," and "Winter," have been used; the peculiar arrangement of the Catalogue renders it impracticable to be more exact in this particular. For example: The Early Harvest Apple is reported as succeeding in almost every State and Territory in the Union, in one locality ripening in May, and in another in July, or even in August,—a difference of two months or more; and yet in every locality it is strictly an *early summer apple*.

The columns are arranged thus: First, the names of varieties; next, the season, use, etc.; and then the States or Districts, the names of which stand at the head of the columns.

The State or District in which any variety is recommended, is designated by a star (*); and in cases where a variety is recommended as being of great superiority or value in any locality, the indication is two stars (**).

It being necessary to carry the column arrangement across two pages, numbers are used on the margin of each page, to prevent errors in following lines.

DIVISION FIRST.

Embracing those States north of the southern line of Virginia, Tennessee, Missouri, etc., and east of the Rocky Mountains, including the Canadas.

I.—APPLES.

EXPLANATION OF COLUMNS.—The first column on the right of the name gives the season of maturity. The second, the particular uses for which the variety is best adapted; and the remainder, the Districts in which the varieties are recommended.

EXPLANATION OF ABBREVIATIONS.—Seasons: S. summer; A. autumn; W. winter; E. early; L. late. Those not designated as early or late of their season may be regarded as medium.

USE.—K. designates varieties recommended only for kitchen purposes. C. those specially for cider. Those not marked K. or C. may be regarded as dessert or table sorts. M. designates those most valued for market.

* Star opposite a variety indicates that such a variety succeeds well in the District named at the head of the column.

** Two stars distinguish those most highly recommended.

II. — PEAR S.

The columns indicate — 1st. The Season; 2d. Use; 3d. Stock; and the remainder the Districts in which the varieties are recommended.

The abbreviations are —

SEASON. — S. summer; A. autumn; W. winter; E. early; L. late.

Use. — K. denotes those recommended *only* for kitchen purposes; M. those most profitable for market.

Stock. — Q. those which are known to succeed well on the Quince stock.

III. — CHERRIES.

The columns explain — 1st. The Season of maturity; 2d. The Class to which the variety belongs; and the remainder the Districts in which the varieties are recommended.

The abbreviations are —

SEASON. — E. early, as Early Purple Guigne, Belle d'Orleans, Kentish, &c., which usually ripen at Rochester, lat. 43 deg., from the 10th to the 20th of June, according to the season. M. medium season, those ripening between 20th of June and 20th of July; and L. late, those ripening after that time.

CLASS. — H. hearts, or tender-fleshed, sweet cherries, such as Black-Heart, or Gov. Wood. B. bigarreau, firm-fleshed, sweet cherries, like Graffion, Napoleon, &c. D. dukes, having more or less acidity, as May Duke. M. mollos, having generally acid fruit, used chiefly for kitchen or confectionery purposes.

IV.—PEACHES.

The columns explain :

1st. The Class, as Freestone or Clingstone, to which the variety belongs.

2d. The Color of the flesh.

3d. The Season of maturity : as Early, Medium, or Late. Those designated as Early, ripen in lat. 43 deg. previous to or about Sept. 1st. Medium, those ripening from 1st to 15th of Sept. ; and Late, those after that period. A few of the Very Early and Very Late are so designated. The remaining columns denote the Districts in which the varieties are recommended.

Abbreviations :

CLASS. — F. freestone ; C. clingstone.

FLESH. — W. white, or pale-colored flesh ; Y. yellow, or yellowish flesh.

SEASON. — E. early ; V. E. very early ; M. medium ; L. late ; V. L. very late.

X.—FOREIGN GRAPES.

As the Foreign Grapes are for cultivation under glass, they are not subject to those variations induced by climate or soil, and therefore they may be regarded as equally adapted to all localities. Very few of the local committees have made any report in reference to these Grapes. The list below contains such as have been already adopted by the Society, with a few others very generally esteemed.

The columns explain—1st. The Color of the fruit; 2d. Flavor; 3d. Season of maturity. In flavor, the only distinction is between those that are simply sweet, as the Chasselas or Hamburgs, and those having a distinct musky aroma, as the Muscats.

No.	NAME.	COLOR.	FLAVOR.	SEASON.
1	Barbarossa <i>Prince Albert.</i> <i>Brizzola.</i>	Black.	Sweet.	Very Late.
2	Black Damascus	Black.	Sweet.	Late.
3	Black Frontignan	Black.	Muscat.	Late.
4	Black Hamburg	Black.	Sweet.	Medium.
5	Black Prince	Black.	Sweet.	Medium.
6	Bowood Muscat	White.	Muscat.	Medium.
7	Buckland Sweetwater	White.	Sweet.	Medium.
8	Calabrian Raisin	White.	Sweet.	Late.
	<i>Raisin de Calabre.</i>			
9	Cannon Hall Muscat	White.	Muscat.	Late.
10	Chasselas Musquée, or Joslin's St. Alban's	White.	Muscat.	Early.
	<i>Muscat blanc Hative (?)</i>			
11	Golden Hamburg	White.	Sweet.	Late.
	<i>Stockwood G. Hamburg.</i>			
12	Grizzly Frontignan	Red and Yellow.	Muscat.	Medium.
	<i>Red Frontignan.</i> <i>Red Constantia.</i>			
13	Lady Down's Seedling	Black.	Sweet.	Very Late.
14	Muscat of Alexandria	White.	Muscat.	Late.
15	Muscat Hamburg	Black.	Muscat.	Medium.
16	Red Chasselas	Red.	Sweet.	Medium.
	<i>Rose Chasselas.</i>			
17	White Nice	White.	Sweet.	Late.
18	West St. Peter's	Black.	Sweet.	Very Late.
19	Wilmot's Black Hamburg	Black.	Sweet.	Medium.
	<i>Dutch Hamburg.</i>			
20	White Sweetwater	White.	Sweet.	Early.
	<i>Dutch Sweetwater, &c.</i>			
21	White Frontignan	White.	Muscat.	Medium.
	<i>White Constantia.</i> <i>Muscat blanc.</i>			
22	Zinfindal	Black.	Sweet.	Medium.
